FACTUAL BACKGROUND

18. Since its founding in 1954, Delta Faucet established itself as a leader in the design and manufacture of high quality, innovative faucets.

19. Delta Faucet has and continues to employ multiple engineers with experience in

the plumbing industry, including several with substantial experience in product engineering and project management of faucets.

20. Delta Faucet and specifically engineer and inventor Alfred C. Nelson, has decades of experience in the plumbing industry including in the product engineering of faucets from concept to production. Mr. Nelson also has decades of experience in designing kitchen faucets, including in developing improved pull-down sprayheads.

21. Over a period of several years, Mr. Nelson analyzed various coupling arrangements for pull-down sprayheads on kitchen faucets and worked on developing an effective solution to long recognized problems of insecure, difficult to operate, and non-durable couplings.

22. In recognition of a long-felt need for an improved coupling arrangement for faucet pull-down sprayheads, Mr. Nelson developed a magnetic docking system that provides an effective, simple to use, and durable coupling between the pull-down sprayhead and the spout.

23. In 2007, Delta Faucet launched MagnaTite® Docking. An example of a MagnaTite® Docking faucet is shown below:

24. Delta Faucet thereafter launched MagneDock® Technology. An example of a MagneDock® Technology faucet is shown below:

25. Following introduction of MagnaTite® Docking, Delta Faucet experienced remarkable commercial success including through an increase in market share in the pull-down kitchen faucet category.

26. Prior to the development of the magnetic docking system by Delta Faucet, magnetic assemblies were not used in the industry to secure the sprayhead in a faucet assembly.

27. Delta Faucet holds intellectual property rights in and to the MagnaTite® Docking and MagneDock® Technology, including through the '079, '217, and '702 patents.

28. Delta Faucet has research and development, testing and engineering, sales and marketing, and business offices in Indiana and in this District, where it has and continues to employ skilled workers concerning MagnaTite® Docking and MagneDock® Technology.

**COUNT I
(INFRINGEMENT OF THE '079 PATENT)**

29. Plaintiff realleges and incorporates by reference all of the preceding paragraphs as if fully set forth in this paragraph.

30. On information and belief, faucets that infringe one or more claims of the '079 patent are identified as having a “DockNetik® magnetic docking system” (“Accused Products”)

on Kohler's website at www.us.kohler.com.

31. A non-limiting example of an Accused Product known as Motif™, is pictorially represented as follows:

- DockNetik® magnetic docking system securely locks the sprayhead into place when not in use.

See also, <https://youtu.be/1A5UAIB3Og>

32. The Accused Products, including the representative Motif™, are sold through various intermediaries, retailers and online as shown at <https://www.us.kohler.com/us/storelocator/storeLocator.jsp?requestid=2293972>, including at a regular and established place of business at 4335 E. 82nd St., Indianapolis, Indiana 46250 known as the Kohler Signature Store. Exhibit A.

33. On information and belief, the representative Accused Product Motif™ is substantially the same for purposes of infringement as the Accused Products.

34. A claim chart that applies claim 1 of the '079 patent to the representative Accused Product Motif™ is attached as Exhibit H. The remaining Accused Products practice all the limitations of claim 1.

35. The Defendant has directly infringed and continues to directly infringe, has actively and knowingly induced and continues to actively and knowingly induce the infringement of one or more claims of the '079 patent, either literally or under the doctrine of equivalents, by making, using, selling, and/or offering for sale within the United States and/or importing into the United States the Accused Products.

36. Upon information and belief, Defendant has notice of the '079 patent. *First*, on information and belief, Defendant regularly surveys the patent literature—and especially that of its competitors—for relevant patents and has encountered the '079 patent. *Second*, this complaint informs Defendant about the '079 patent. *Third*, Plaintiff virtually marked and continues to virtually mark the '079 patent at <https://www.deltafaucetcompany.com/patent>, pursuant to 35 U.S.C. § 287(a). Despite knowledge and notice of the '079 Patent, Kohler has continued to offer for sale and sell the Accused Products to customers in the United States, without the consent or authority of Delta Faucet. Notwithstanding this knowledge, Defendant has knowingly or with reckless disregard willfully infringed the '079 patent and has acted despite an objectively high likelihood that its actions constitute infringement of Plaintiff's valid patent rights.

37. On information and belief, Kohler actively induces others to infringe the '079 Patent by selling the Accused Products to others with materials and instructions for operation, with the specific intent and knowledge that the materials direct, teach or assist others to infringe the '079 Patent. For example, on information and belief, Kohler induced infringement of the '079 Patent by encouraging and facilitating infringing use of the Accused Products by users of

the Accused Products in the United States, by taking active steps to encourage and facilitate others' direct infringement of the '079 Patent with knowledge of that infringement. The affirmative acts include, without limitation, advertising, marketing, promoting, offering for sale and/or selling the Accused Products as shown at www.us.kohler.com. Kohler further provides instructions, user manuals, advertising and/or marketing materials on Kohler's website that facilitate, direct, or encourage the direct infringement in the United States as shown at www.us.kohler.com. Defendant's infringing acts have caused, and are continuing to cause, damage and irreparable injury to Plaintiff, and Plaintiff will continue to suffer damage and irreparable injury unless and until Defendant's infringing acts are enjoined by this Court.

38. Plaintiff is entitled to injunctive relief and damages in accordance with 35 U.S.C. §§ 271, 281, 283, and 284.

39. Defendant's infringement of the '079 patent has been and continues to be willful and deliberate, justifying a trebling of damages under 35 U.S.C. § 284.

40. Defendant's infringement of the '079 patent is exceptional and entitles Plaintiff to attorneys' fees and costs under 35 U.S.C. § 285.

41. Therefore, Plaintiff seeks a judgment that Defendant directly infringes and/or induces infringement of at least claim 1 of the '079 Patent.

**COUNT II
(INFRINGEMENT OF THE '702 PATENT)**

42. Plaintiff realleges and incorporates by reference all of the preceding paragraphs as if fully set forth in this paragraph.

Exhibit A.

46. On information and belief, the representative Accused Product Motif™ is substantially the same for purposes of infringement as the Accused Products.

47. A claim chart that applies claim 1 of the '702 patent to the representative Accused

Product Motif™ is attached as Exhibit I. The remaining Accused Products practice all the limitations of claim 1.

48. The Defendant has directly infringed and continues to directly infringe, has actively and knowingly induced and continues to actively and knowingly induce the infringement of one or more claims of the '702 patent, either literally or under the doctrine of equivalents, by making, using, selling, and/or offering for sale within the United States and/or importing into the United States the Accused Products.

Notwithstanding this knowledge, Defendant has knowingly or with reckless disregard willfully infringed the '702 patent and has acted despite an objectively high likelihood that its actions constituted infringement of Plaintiff's valid patent rights.

50. On information and belief, Kohler actively induces others to infringe the '702 Patent by selling the Accused Products to others with materials and instructions for operation with the specific intent and knowledge that the materials direct, teach or assist others to infringe the '702 Patent. For example, on information and belief, Kohler induced infringement of the '702 Patent by encouraging and facilitating infringing use of the Accused Products by users of the Accused Products in the United States, by taking active steps to encourage and facilitate

51. Defendant's infringing acts have caused, and are continuing to cause, damage and irreparable injury to Plaintiff, and Plaintiff will continue to suffer damage and irreparable injury unless and until Defendant's infringing acts are enjoined by this Court.

52. Plaintiff is entitled to injunctive relief and damages in accordance with 35 U.S.C. §§ 271, 281, 283, and 284.

53. Defendant's infringement of the '702 patent has been and continues to be willful and deliberate, justifying a trebling of damages under 35 U.S.C. § 284.

54. Defendant's infringement of the '702 patent is exceptional and entitles Plaintiff to attorneys' fees and costs under 35 U.S.C. § 285.

**COUNT III
